PROFILE

Front-End Developer with a passion for technology. Throughout my career I have worked around technology especially while coordinating projects. Working with developers who would make these projects come to life really sparked my interest in coding. This led me to the immersive web development bootcamp at Juno college.

EXPERTISE

HTML, CSS and SASS/SCSS, Javascript, JQuery and React, Rest API and AXIOS, GIT, Firebase and VS Code.

PROJECTS

- **City Bike Share -** JQuery interactive app, accessing a public bike share API and manipulating DOM to display data of number of bikes available at a specific bike share stand within 0.5KM of a pre-selected location in Toronto.
- **Dream Desk Store -** An interactive React application that renders data from Firebase database. Data includes details of the desk, price and curated stock image of the item. App allows users to add to cart desks , with the cart counter updating and checkout details displayed.
- **Quarantine Trivia** - Interactive React app utilizing AXIOS to access Quiz data and render it for the user. With the choice of categories and number of questions. User is also able to save quiz (stored in firebase) and access it later. While taking the quiz the app displays whether the answer was correct or incorrect and user score.

EXPERIENCE
CUSTOMER SERVICE CONSULTANT, ROGERS COMMUNICATIONS
OCT 2018 - MARCH 2020

- Effective communication with. Customer to ascertain their needs and offer appropriate solutions to resolve any product, service or billing issue customer had.
- Train and mentor new hires, guiding them both on customer interactions and system usage.
